 **DREW TECHNOLOGIES**

Bringing our DrewTech Support to you.

How does it work? It's simple!

Plug-in the kit,

After you've finished your part replacement or repair, it's time to finish the job with RAP®. Everything you need is packed in an easy to use, all-in-one kit. There's no need to purchase additional tools, OEM subscriptions, or even have the expertise to get the job done.

Give us a call,

After you've set up the kit, call our toll-free number to get started and connect with one of our world renowned Support experts.

We flash the car!

We bring DrewTech Support to you! Our Support experts will do the required J2534 programming so you don't have to. Once the job is done, just pack the RAP kit back up for next time. You only pay for each service, and success is guaranteed!

Features & Benefits

All-in-one kit

RAP® consists of a self-contained hardware kit and remote service that allows any independent repair or collision shop to update software in a car's computer system(s) during service or when replacing parts.

Design

The RAP® system was designed as a true turn-key remote solution that can be used by any technician, regardless of experience. Drew Technologies developed a hardware kit that consists of a Windows PC, J2534 device, internet access modem, OEM subscriptions, and battery maintainer, flash software for each supported automaker, and a remote interface directly to our Support experts.

Success is guaranteed

Drew Technologies guarantees success! There is no up-front cost to lease the kit so you can enjoy the peace of mind while you retain your high profit repair services.

Experts in J2534

RAP® leverages success from other Drew Technologies J2534 products and its industry leading technical support team, while incorporating over a decade's worth of intellectual property with several patent(s) pending.

© 2016 Drew Technologies, Inc. A fee of \$19.95 per month will be charged if users fail to use the remote service at least twice a month. Patent(s) pending. BDT62
